

The Company

- Founded in November 2004
- Software editor dedicated to private banks
- Experienced team dedicated to its clients: Banks, Family Offices, Industry, Public
- Independent company
- Based in Geneva (Switzerland)
- Presence in Zurich, Luxembourg, USA, Singapore and Hong Kong

Partnership and agreements:

Worldwide

Located in Geneva

Onsite development and Support

Expertise in Private Banking

19 years of experience developing software for the Private Banking industry
Our strength: mixing business understanding & technology mastery

Tailor-Made Solution

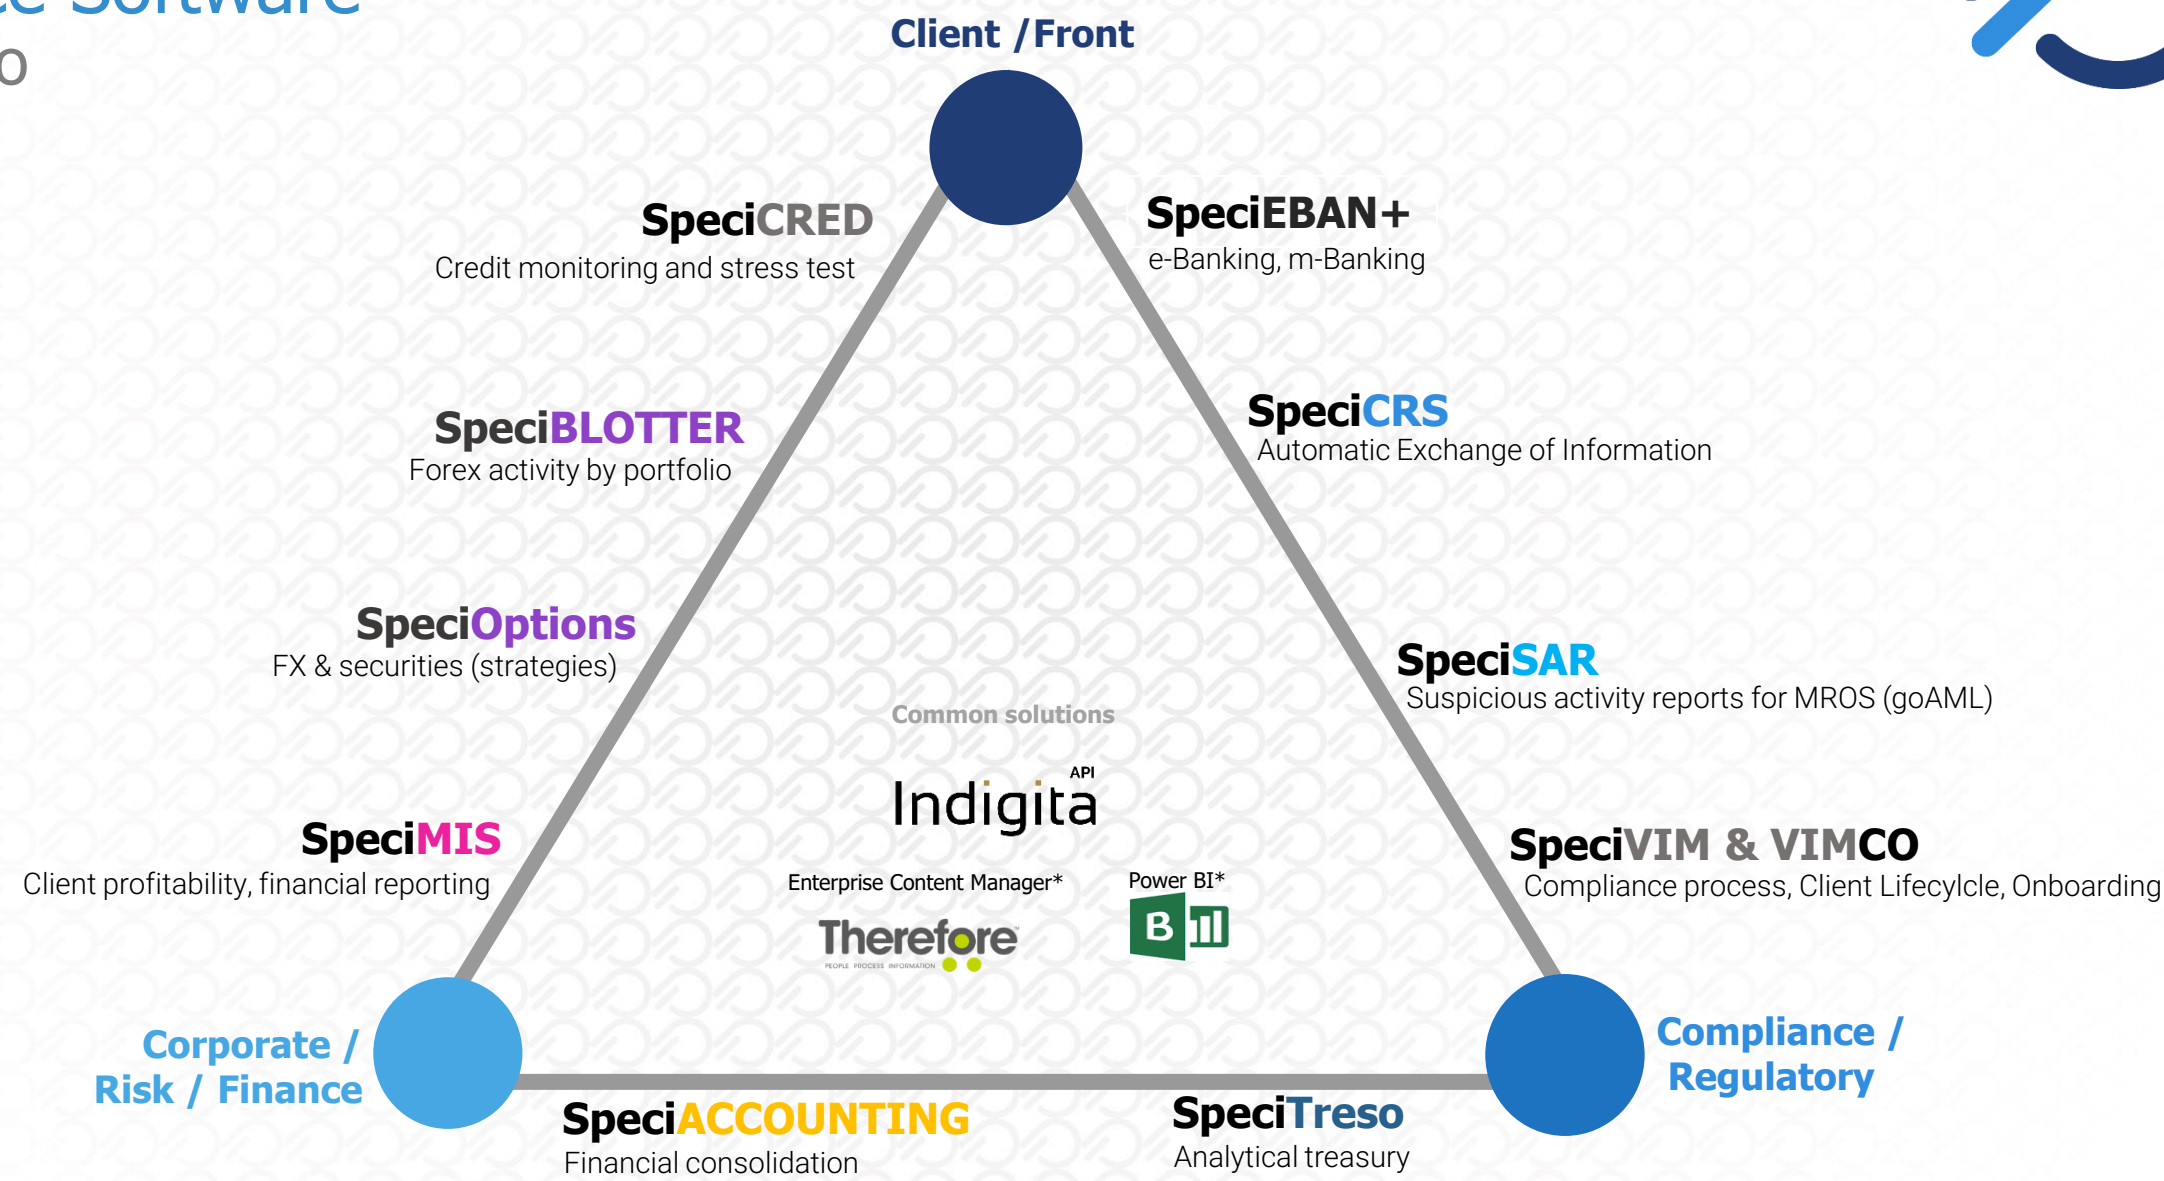

Easily customizable solutions
Conceived and developed to answer to specific requirements

Trusted partner

80 Installations
30 Banks
3 Products by clients

Finance Software Portfolio

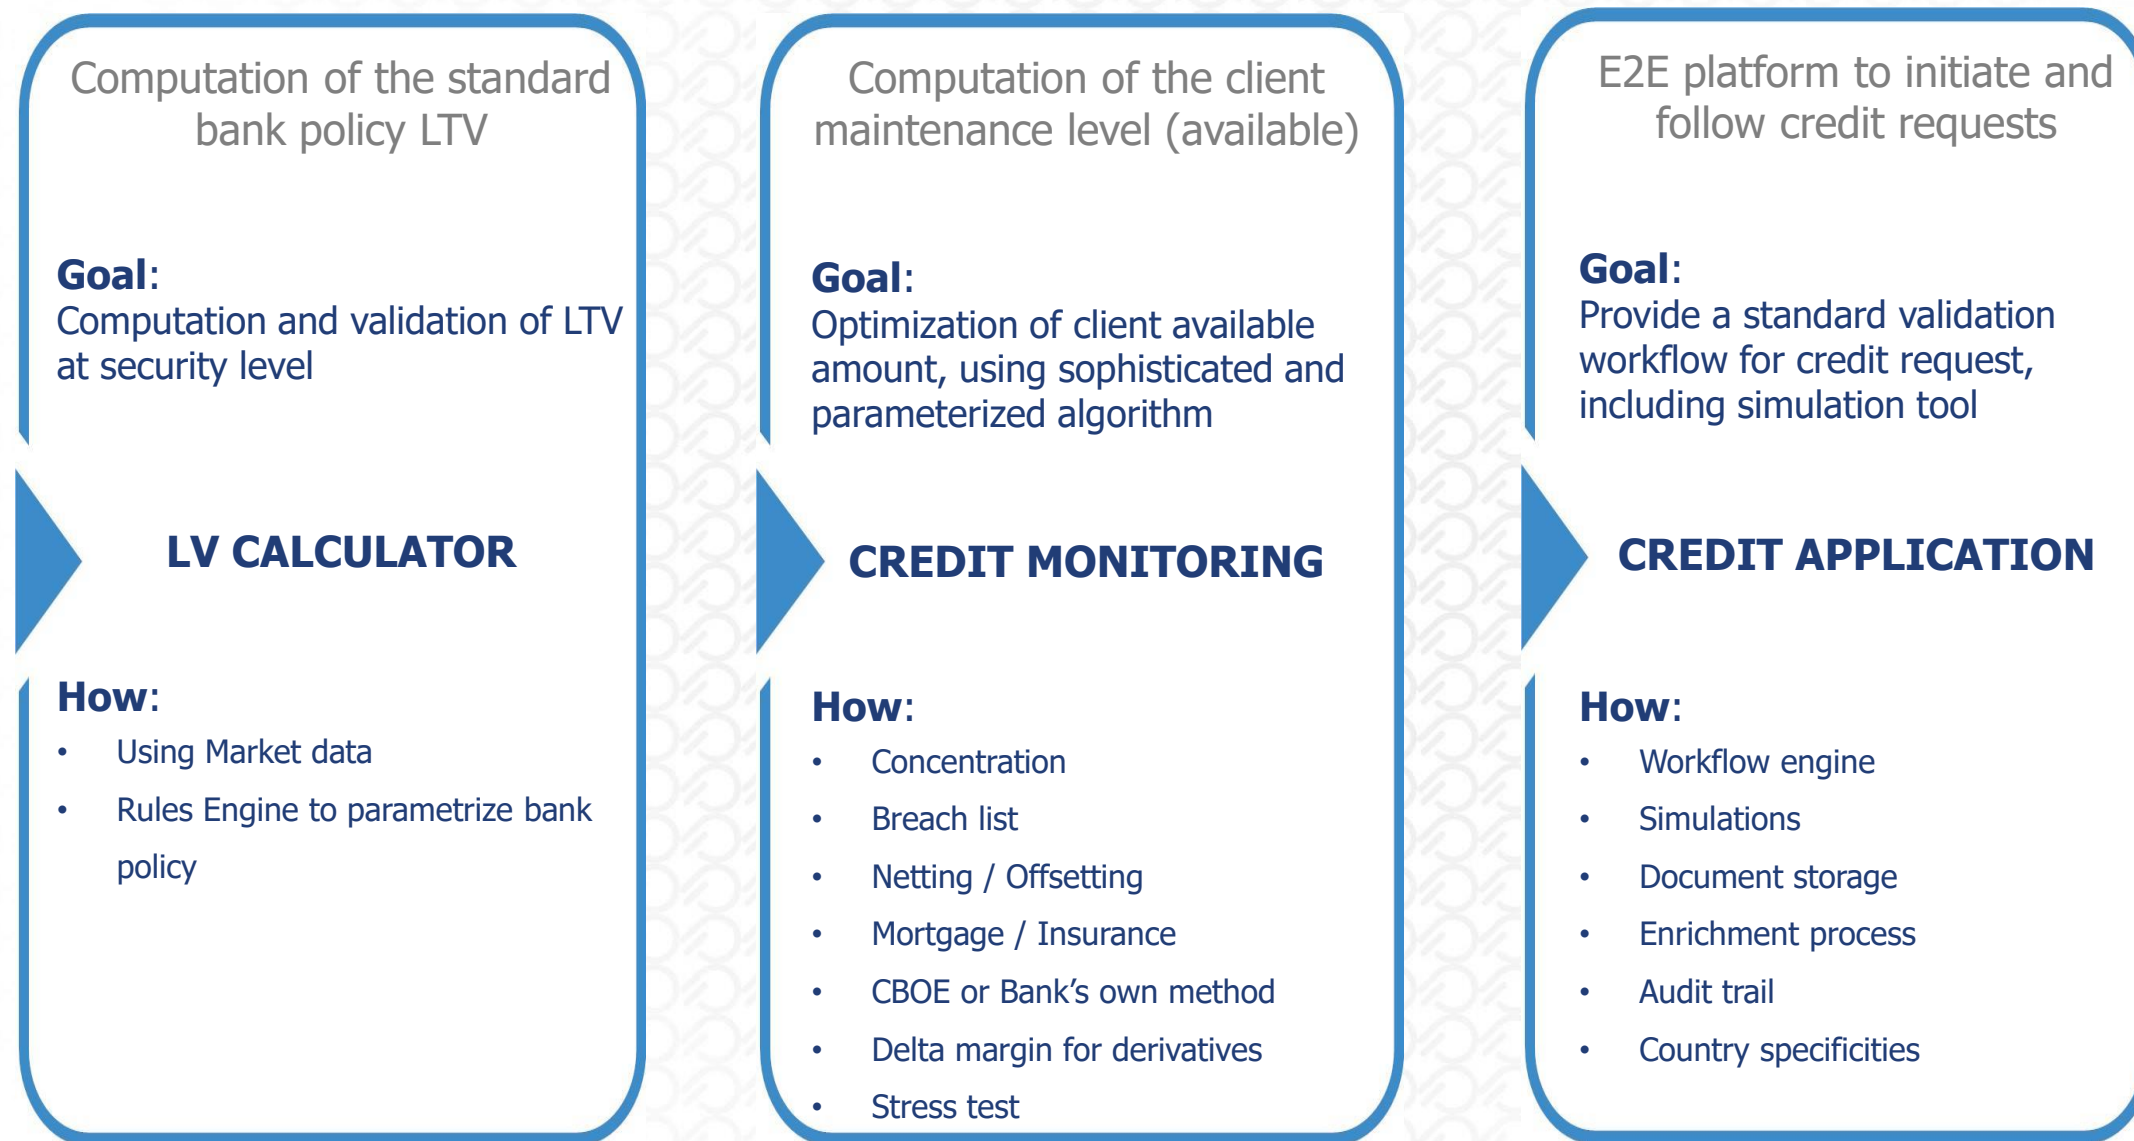

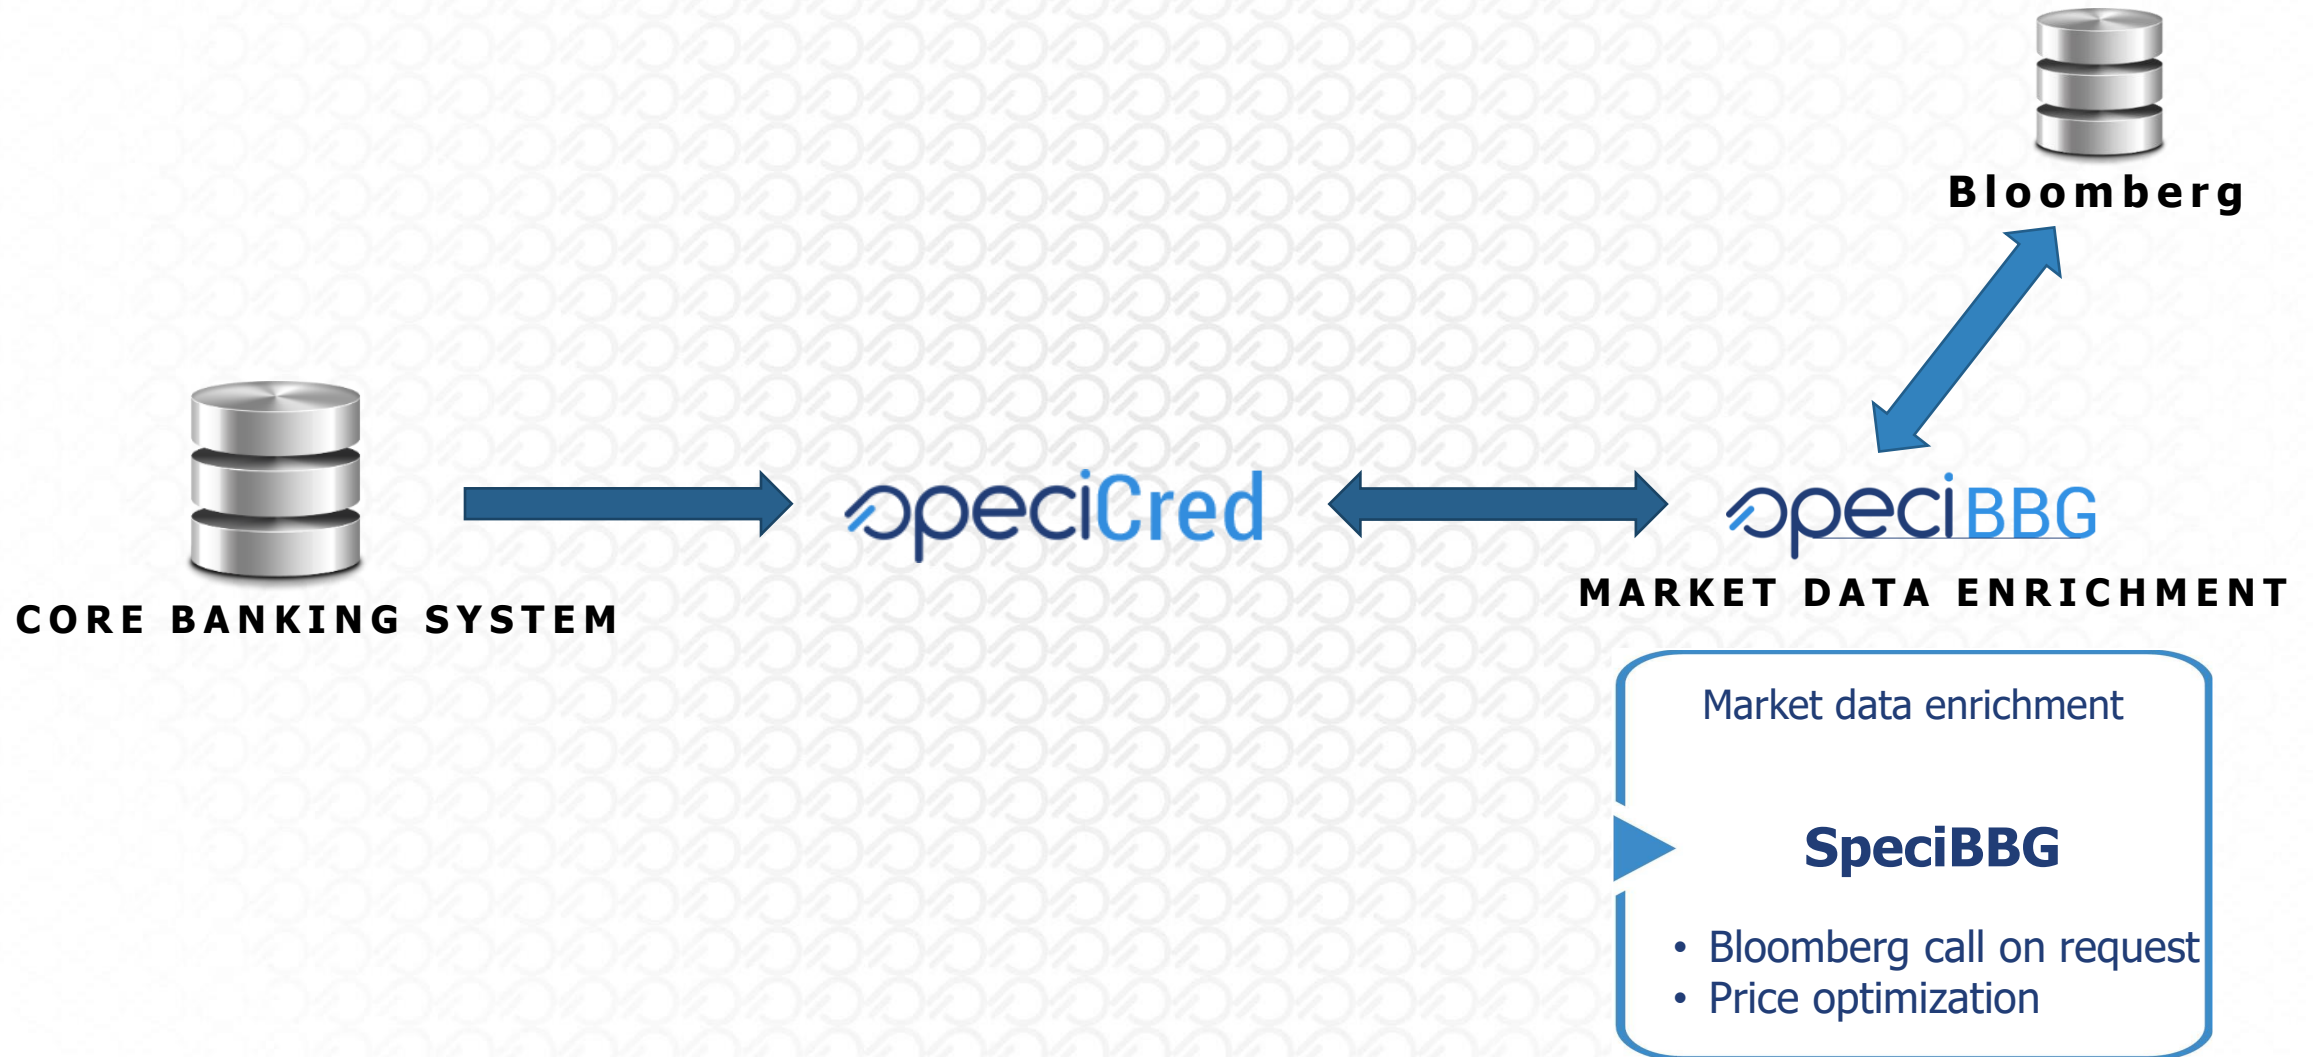

peciCRED

CREDIT MONITORING AND APPLICATION
THE LEADING INNOVATIVE CREDIT SOFTWARE

SpeciCred Modules

Standard Security LTV

SpeciCred Overview

Main modules

- Credit monitoring / Breach list
- Stress tests Scenarios
- Live Module (SpeciCred as a Service)
- Lending Value Calculator

Credit monitoring

Main modules

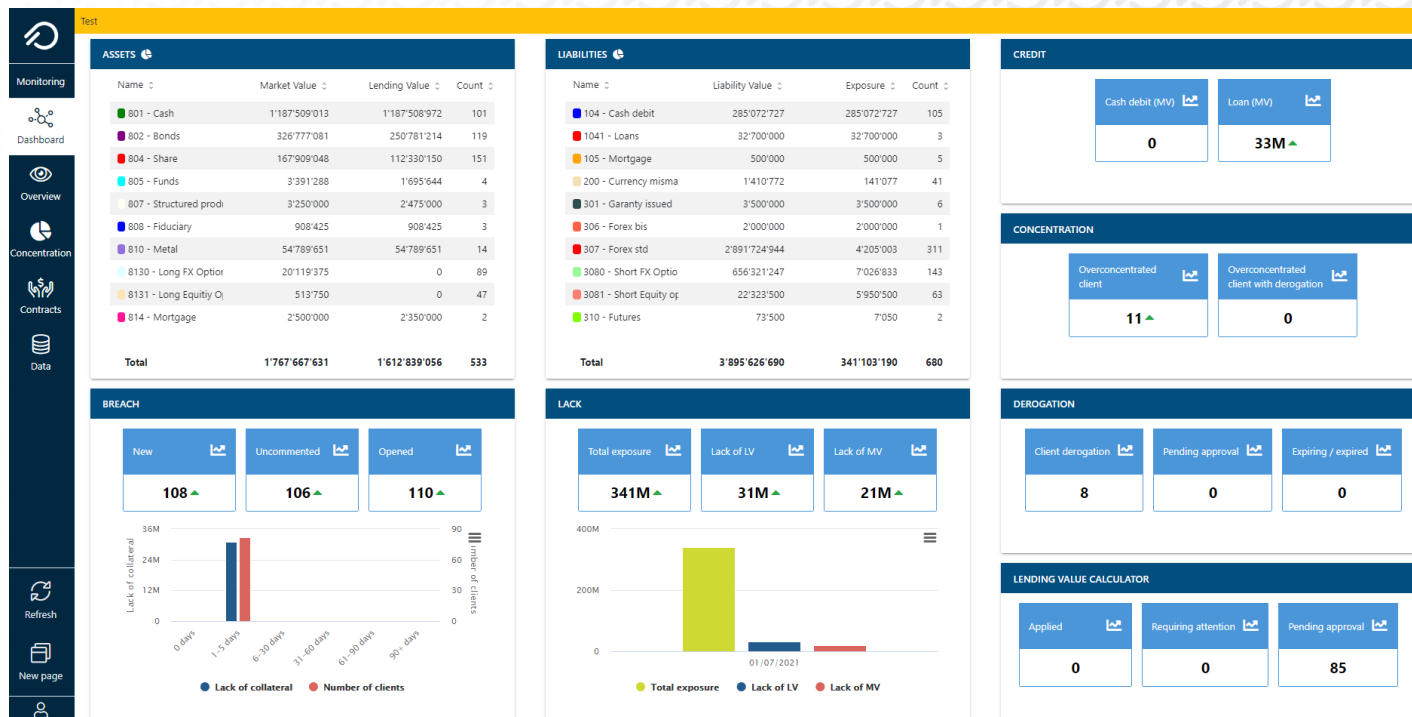

- Lending Value Calculator
- Credit monitoring / Breach list
- Credit application

Other modules

- Dashboards
- Stress tests Scenarios
- Live Module (SpeciCred as a Service)
- SpecBBG (Market data enrichment)

Business benefits

- Efficient and interactive tool to monitor your credits
- A powerful solution including:
 - Graphical tools
 - Collateral and Guarantees management
 - Risk calculation engine
 - What-if scenario engine
 - Audit Trails
 - Reports, dashboards
 - Alert management
 - Pledge allocation

Pledge allocation

Allocation method

- Per market value, Client situation value

Limit breach, documentation

- Breach management list, warnings, documentation

Concentration view

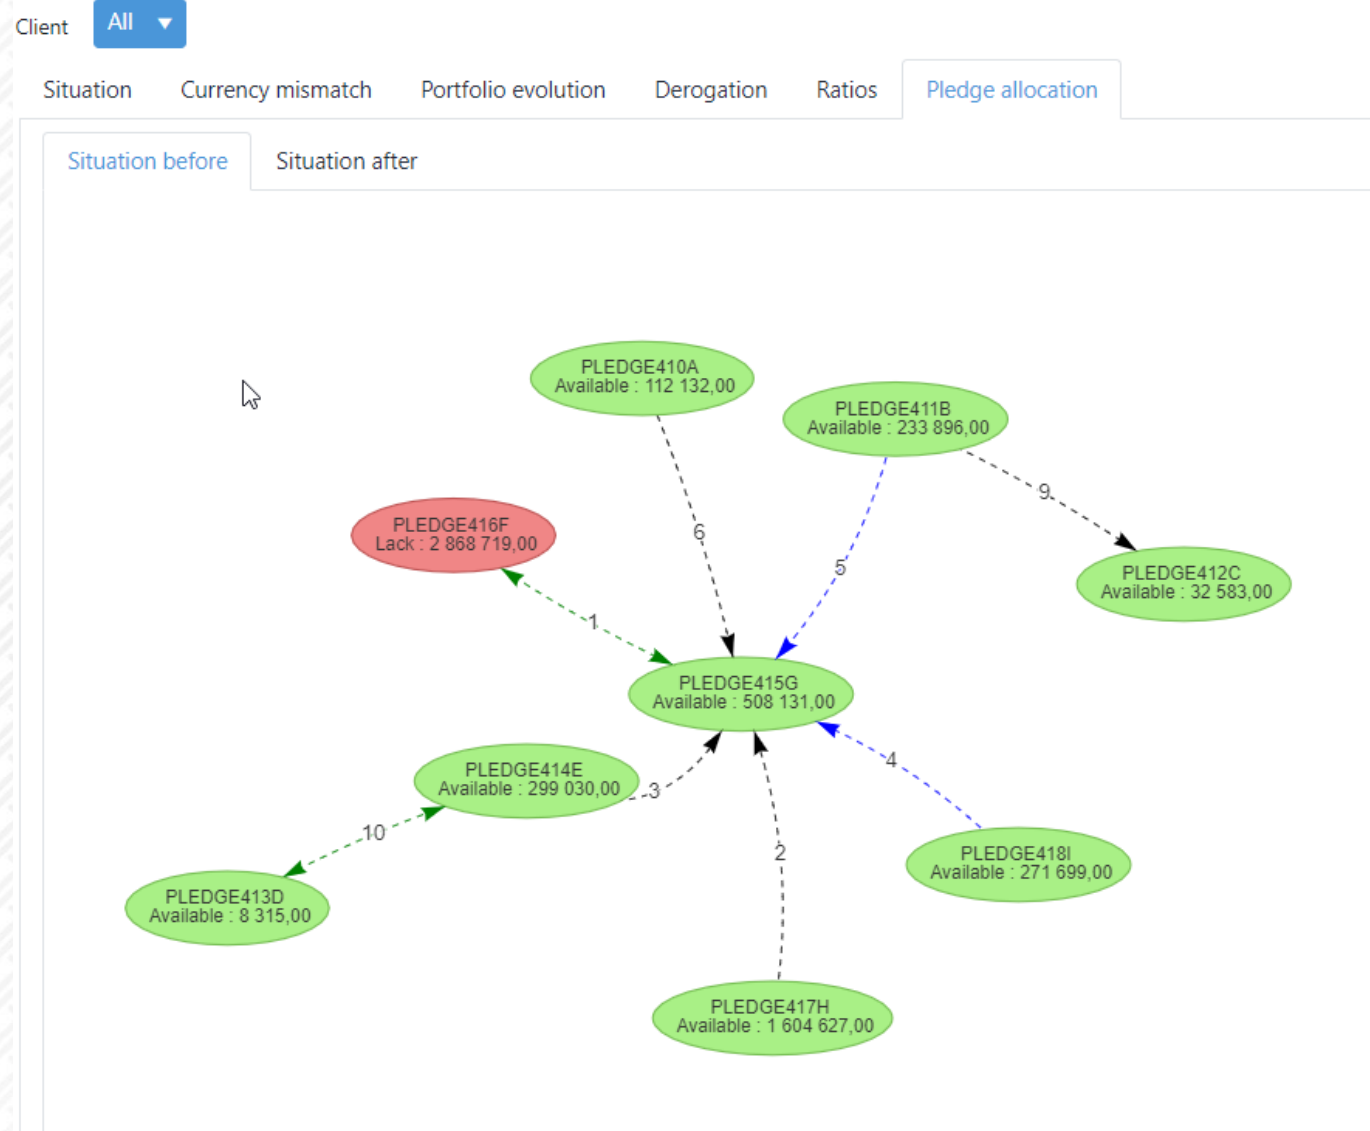

- Per Asset / Issuer / Rating / Currency / Country...

Scenarii

- Execute scenario on currency, instrument, account kind...

Reporting

- Daily list: lack of collateral, limit breach...
- Scenarios list

SpeciCred features

Credit application

- Input mask depending on the credit type (Lombard / mortgage)
- Simulation
 - Existing utilization & credit line
 - New utilization & credit line
 - Existing & new collateral
 - Currency breakdown
 - Group overview
- Validation workflow
- Reviewing and renewing CA

Breach list and comments

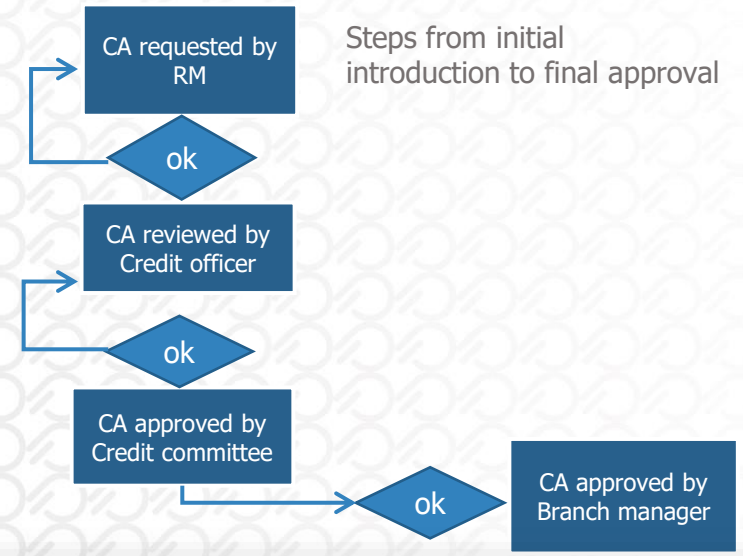

- Breach list
- Comment & documents
- Audit trail
- Client situation

IT platform

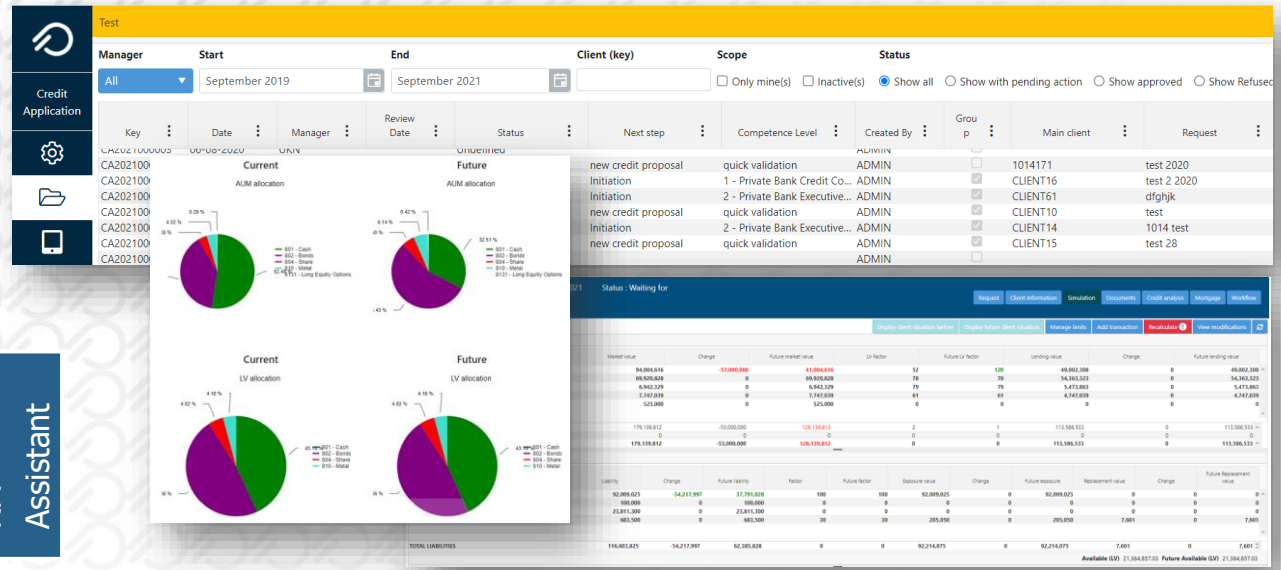

- Web
- SQL server 2012 et +

Workflow

Steps from initial introduction to final approval

Main users

New Margin Module

Instruments and Valuation Methods

Pricing methods

Available pricing methods are:

- Black & Scholes models (Garman Kohlhagen is an extension of B&S for FX)
- Delta-Gamma method (1st and 2nd order approximations based on the greeks)
- Monte Carlo method
- Greeks
 - Delta
 - Gamma
 - Theta
 - Vega
- Value at Risk (VaR)

Products

FX (underlying currency / precious metals) :

- FX Spots
- FX Forwards
- FX Swaps
- NDF
- Dual & Triple Currency Deposits
- FX Options (vanilla, single barrier, double barrier, window, non- deliverable)
- FX Accu/Decus
- Target Redemption Forwards
- Pivot Target Redemption Forwards
- IRS / OIS
- REPO

Equities:

- Equity options (vanilla, barrier)
- Equity Accu/Decus (with leverage/guarantee period)
- Index Options

Advantages of SpeciCred for the bank

Benefits of SpeciCred by module

Computation of the standard Bank Policy LTV

LV Calculator

- Thinner control based on refreshed market data
- Get more aggressive LTV
- Sophisticated rules engine
- Friendly end-user interface
- Performant audit functions

Computation of the client maintenance level (available)

Credit Monitoring

- Parametrize sophisticated rules:
 - Concentration
 - Netting / Offsetting
 - Derivatives
- Breach list
- Dynamic pledge allocation
- Collateral analysis
- Friendly end user interface
- Compute and parametrize stress test scenario

E2E platform to initiate and follow Credit requests

Credit Application

- Centralized information
- Sophisticated simulation tool
- Automate Credit renewal
- Workflow and Approval process

Market data enrichment

SpeciBbg

- Get better and refreshed market data
- Bridge your core security master file gaps

Business case 1. Automate manual monitoring

Initial situation:

Credit officers monitor customer credit risks and prevent incidents before they occur while allowing the bank to remain competitive on the terms offered to the client. To avoid mistakes, credit officers spend a lot of time to figure out the situation of the client.

Advantage with SpeciCred:

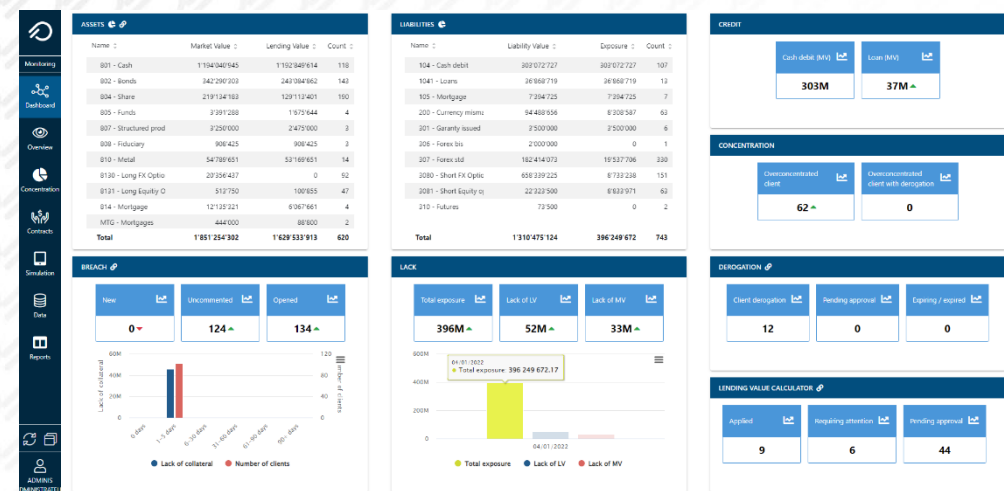

The detection and the documentation of the client situation can be done with a few clicks within SpeciCred, even for complex client structures (e.g., 50 interconnected different accounts).

Benefits:

- Reduction of the risk of computation mistakes due to manual processes (credit officer)
- Decrease the workload and time preparation for credit files or reports (credit officer)
- Remove stacks of paperwork that are difficult to process efficiently (C-Level, Credit Committee)
- Dynamic and precise visualization of complex cases

LENDING VALUE CALCULATOR

Calculate the lending rate in an automated way with fresh market data

Business case 2. Optimize the loan to value of a client

Initial situation:

Standard banking systems allow the computation of Lombard weighting factor (lending value) with few options.

Advantage with SpeciCred:

SpeciCred uses finer algorithms to calculate these values on a daily basis and to alert on any differences with the core banking system.

Benefits:

- Possibility for the bank to implement a more aggressive credit policy
- Daily detection of conditions that deviate from the bank's credit policy
- Decrease in the margin of error associated with manual computation

LENDING VALUE CALCULATOR

Calculate the lending rate in an automated way with fresh market data

The screenshot displays the 'LENDING VALUE' interface. It features a table with columns for Status, Instrument Key, ISIN, Description, Actuals, Source, Calculated, Manual, and Instrument Code. The table lists various financial instruments, including ARKEMA, Sovereign Bonds, and others, with their respective calculated and manual values. On the right side, there is a sidebar for 'INSTRUMENT : 001082578.00' which includes fields for 'Use value' (calculated), 'Override with manual', and 'Concentration Capping'. The bottom of the interface shows a 'Review date' of 26/03/2022 and a 'Comment' field.

Business case 3. Simulate market downturns

Initial situation

With the various waves of Covid impacting the economy and the recent invasion of Ukraine, banks need to simulate the impacts of these crises with stress tests for the past two years.

Advantage with SpecuCred:

SpecuCred offers the ability for end users to build their own models and reports autonomously within a few minutes.

Benefits:

- Autonomy of risk and credit departments to build their own crises scenario
- Identify your clients at risk and focus on them
- Greater reactivity to crises with a few minutes of computation to see the impact of a crisis scenario compared to the real data of the day

**STRESS TEST
SIMULATION**

Set-up scenarios for comparison and anticipation; helps mitigate risks of credit lines and other adequate assets

Business case 4. Digitalize the Credit Request Processes

Initial situation:

Managing credit request manually leads to a fastidious time-consuming process, impacting the timeframe answer of the bank to the client.

Advantage with SpeciCred:

The Credit application module is a platform to smooth the process of analyzing and approving a credit request. It is adapted to any kind of credit (Lombard loan, mortgage, life insurance, hybrid...) and onboards a simulator to get a better analysis of the client situation and support the Credit committee decision.

Benefits:

- Guarantee the execution of the bank policy to approve a credit request
- Audit trail the decision with documentation attached
- Reduce response time of the initial credit request

CREDIT REQUESTS
/ APPLICATION

E2E platform to initiate, document and approve credit requests with a powerful workflow engine

The screenshot displays the 'Credit application' interface for client CA2022000020. The top navigation bar includes tabs for Request, Client information, Parties, Simulation, Documents, Credit analysis, Workflow, and Contract/Pre-require. The main form is titled 'CLIENT CLIENT256 (MAIN)' and contains several sections:

- Client background:** Includes fields for Account number (CLIENT256), Portfolio manager (name 0022), Kind of borrower, Investor, Valid KYC, and Capability to take on debt (Yes/No). It also features dropdowns for Account name A/N, Beneficial owner name, Credit documentation, Times in margin call over the last 12 months, KYC review date, and Domicile country A/N and B.O. There are radio buttons for 'A/N is also B.O.' and 'Request for personal guarantee'.
- Business strategy:** Includes fields for Total wealth, EAM retrocession, and Potential 360°, along with dropdowns for Currency and Initial funding, and radio buttons for Sale of property (Yes/No).

Buttons for 'Save' and 'Cancel' are visible in the top right corner of the form area.

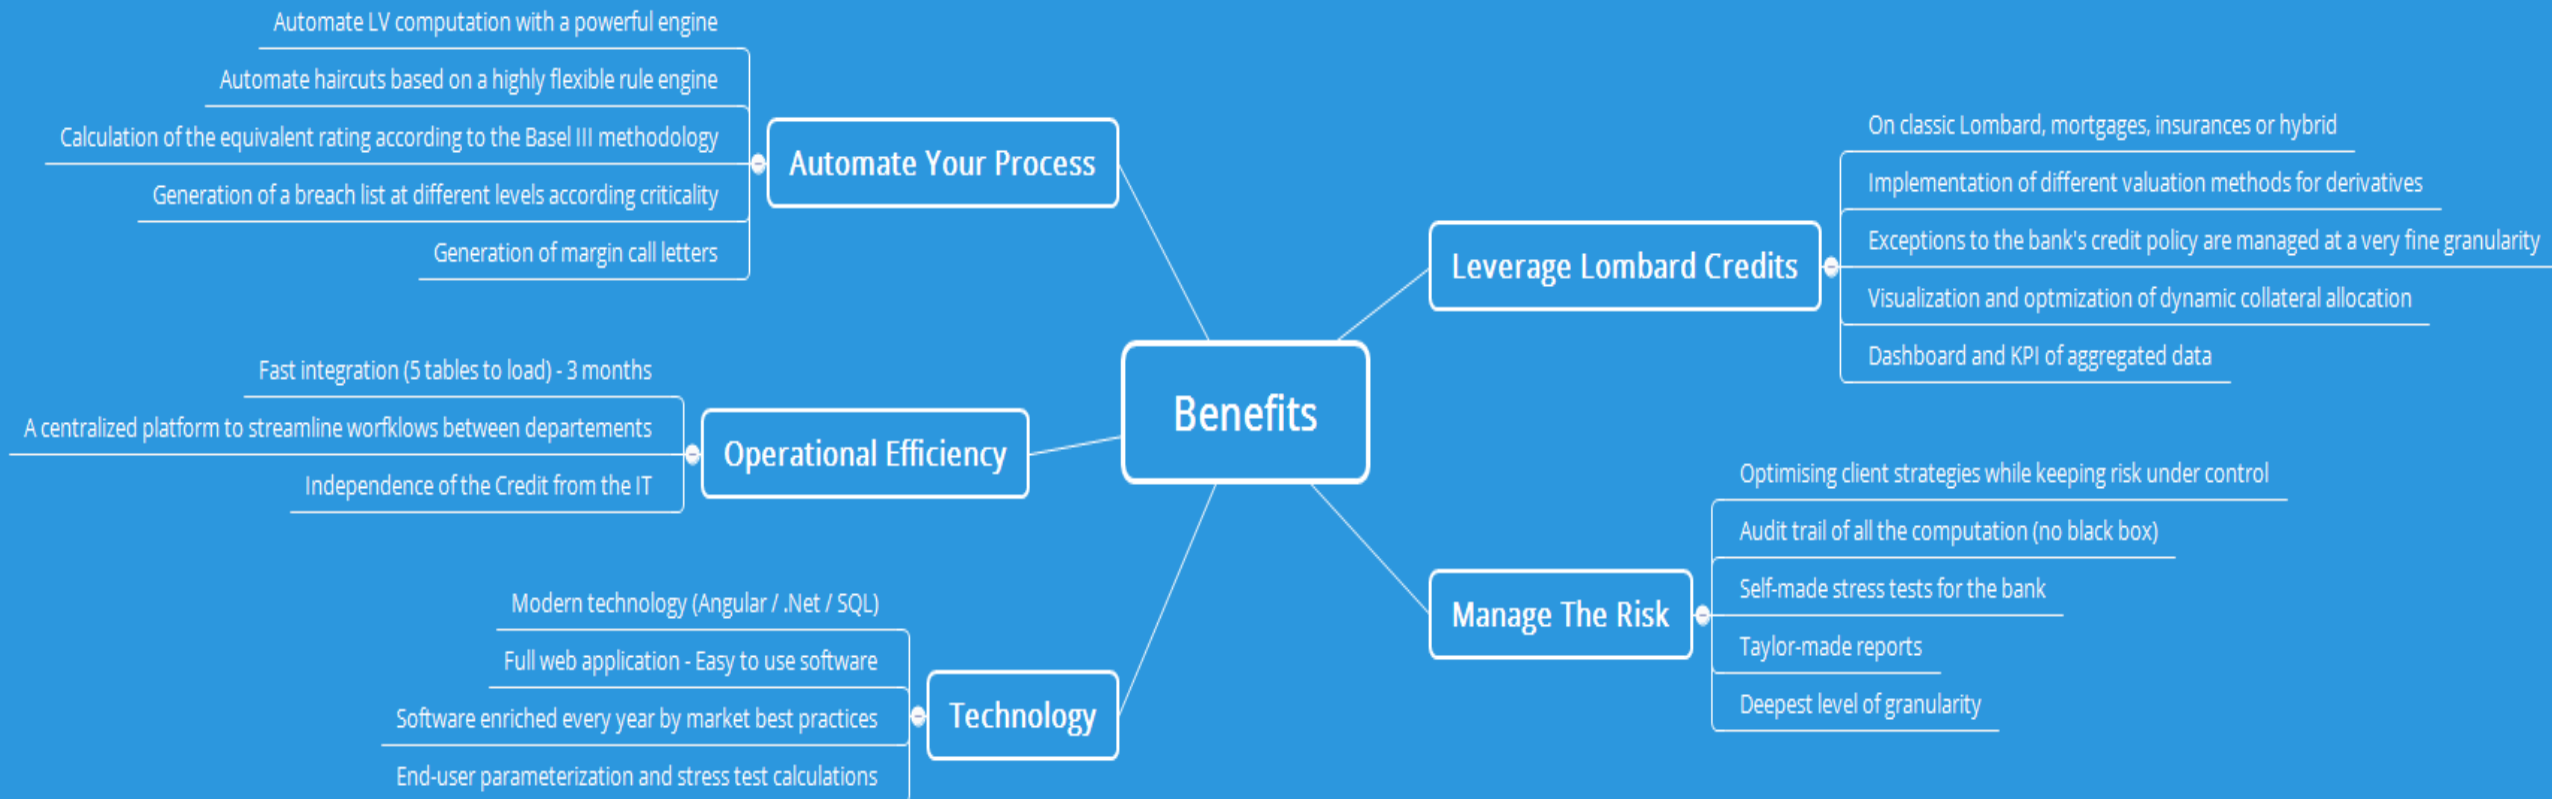

Benefits of SpeciCred for the Bank

Stakeholders	Benefits
Credit officers	<ul style="list-style-type: none">✓ Handles a larger volume of credits due to automation✓ Monitor and prevent the lack of collaterals thanks to early warnings and alerts (Breach list)✓ Plan and schedule daily tasks with the event planner✓ Monitor the adherence of all lending values with the credit policy of the bank✓ Live monitoring for very active clients✓ Simplify paperwork, workflows, communication and approval processes
Head of Credit	<ul style="list-style-type: none">✓ Transparency on all credit activities (no black box)✓ Immediate availability of the information for counterparts within the bank
Risk	<ul style="list-style-type: none">✓ Stress tests particular clients or the whole portfolios with scenarios✓ Special monitoring of hot clients with ad-hoc hot lists.✓ Get credits KPI and raw data in seconds
Compliance	<ul style="list-style-type: none">✓ Get timely information on risky clients✓ May be involved in the Credit Application process for relevant clients
Front	<ul style="list-style-type: none">✓ Instantly initiate a new credit application✓ Ability to simulate a new credit for a prospect or an existing client before the credit application✓ Monitor the lending value of the portfolio of their clients with all pertinent details
CEO	<ul style="list-style-type: none">✓ Increase drastically the credit business while maintaining the risk under control✓ Get a whole overview of the bank's activity in an instant (Dashboard with KPIs)
CFO	<ul style="list-style-type: none">✓ Reduce cost✓ Centralize activities within one system
IT	<ul style="list-style-type: none">✓ Provide flexibility to the users with low maintenance✓ Provide access to a better granularity of information to the users at no extra cost

CREDIT MONITORING AND APPLICATION
THE LEADING INNOVATIVE CREDIT SOFTWARE

SpeciCred by SpeciTec

Held by its members, SpeciTec is an independent organization, collaborating with many private and public actors.

For the last 3 years, the growth of SpeciTec is fastening up to 20%, and 80% the benefits are invested in Research and Development.

Acquiring SpeciCred means adopting Private Banking market best practices. Satisfied clients are available to share our collaboration experience with you.
