

## YOUR PARTNER FOR SUCCESS: UNIQ PROFESSIONAL SERVICES

ADDRESSING ACCOUNTING ISSUES FOR FINANCIAL INSTITUTIONS AND  
PLANTING THE SEEDS FOR ANALYTICAL AND REPORTING NEEDS

### Financial & Management Accounting Solutions

*Our Aim is to help Financial Institutions realise their business objectives in terms of a Temenos Accounting Implementation. This is by accurately defining the scope, the process review, the configuration, and how to bridge the identified gaps in the most efficient ways.*

*Over 30 years of work experience across several countries and jurisdictions in Financial information systems, of which 20 years in banking, with special Focus on Accounting, Statutory & Regulatory Reporting, IFRS, Taxes, as well as Management Accounting and Analytics.*

Our standard approach is based upon an assessment phase to understand customer's issues and needs. Once completed we will be able to provide the most appropriate solutions such as:

1. Configuring new functions & features in your existing systems. Provide training and assistance during and after the project deployment.
2. Review your business procedures, update them with new core banking functions, features, and Processes.
3. Implementing complementary solutions including UniQ Soft Technology applications or any third party providers.

#### **Project Scoping:**

*With our expertise in Project Scoping, we support our clients in mitigating project risk and cost, by defining key phases, reasonable timelines, allocating qualified resources, and assuring quality deliverables.*

#### **Accounting Process Review:**

*We help our clients transform their procedures to adopt new system Functions & Features. Thereby avoiding them non necessary and expensive customizations and facilitating project success.*

#### **Bridging the Gaps:**

*We help our clients identify Process & Function Gaps, and we provide them with solutions; either by configuring and customizing their core banking systems, or by recommending complementary solutions based on our UniQ application suit.*

#### **Core banking implementation:**

*We provide professional services in core banking system integration by assisting clients at the different project phases, from Project Scoping to post live support, through solution design, validation, testing and go live.*

#### **Integration with complementary solutions:**

*We can help our clients select and integrate complementary solutions provided by UniQ Soft Technology or by any other third party provider. This could be based on different types of interface and integration methods.*
